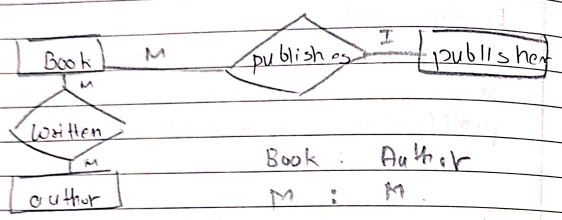
Practical - 3

Q) Book (Bid, Bname, price, year_of_publish, genre, isbn, Pid) publisher (Pid, Pname, city, email, phone) Author (Aid, Aname, contact, email) Book_Author (Bid, Aid, Address)

Book : publisher
M I



Book : Author
M : M

(*) Creating database.

```
mysql> CREATE DATABASE Library;

mysql> USE Library;
```

(*) Creating tables & adding column address in Book_author table.

```
mysql> Create table book (
        book_id INT Primary key,
        title VARCHAR (50),
        price INT,
        ~~where bid = 1~~ ;
        publisher_id INT,
        Foreign key (Publisher_id)
        References publisher (publisher_id)
        );

mysql> Create table publisher (
        publisher_id INT primary key,
        name varchar (50),
        city varchar (30),
        country varchar (30)
        );

mysql> Create table author (
        author_id INT Primary key,
        author_name varchar (50),
        contact varchar (15)
        );

mysql> Create table book_author (
        book_id INT,
        author_id INT,
        primary key (book_id, author_id),
        Foreign key (book_id) Reference
        book (book_id),
        Foregin key (author_id) Referenc
        author (author_id)
        );
```

* Inserting values into the table.

```
mysql> Insert into publisher values
(1, "CRC Press", "Mumbai", "India"),
(2, "Oxford", "Dpublisherchi", "India"),
(3, "Pearson", "London", "UK"),
(4, "McGraw Hill", "New York", "USA"),
(5, "Wiley", "Berlin", "Germany");

mysql> Insert into author values
(1, "John", "9876543210"),
(2, "Smith", "8876501 32"),
(3, "Amith", "9920501 23"),
(4, "Rahul", "99820 50123"),
(5, "Neha", "9090909090")

mysql> Insert into Book values
(101, "DBMS", 250, 2020, 1),
(102, "Python", 300, 2021, 2),
(103, "AI", 150, 2020, 3),
(104, "IOT", 90, 2019, 4),
(105, "Cloud", 400, 2022, 5);

mysql> Insert into Book_Author values
(101, 1), (102, 2), (103, 3), (104, 4), (105, 5)
```

* Verify table.

book_id	title	price	publisher_year
101	DBMS	250	2020
102	Python	300	2021
103	AI	150	2020
104	IOT	90	2019
105	Cloud	400	2022

publisher_id
1
2
3
4
5

* Listing the book published in the year 2020.

```
mysql> Select * From book where publisher_year=2020
```

bookid	title	price	publisher-year	publisher_id
101	DBMS	250	2020	1
103	AI	150	2020	3

* Displaying all books whouse price is greater than 100/- Rs from book table

```
mysql> Select * from book where price > 100;
```

bookid	title	price	publisher-year	publisher_id
101	DBMS	250	2020	~~2020~~ 1
102	Python	300	2021	~~2021~~ 2
103	AI	150	2020	~~2020~~ 3

105	Cloud	400	2022

5

(*) Delete a particular record from book_author table

mysql> Delete from book_author where book_id = 104 AND author_id = 4;

(*) Update particular record from Book table

mysql> update book
SET price = 500
where price = 250;

(*) Find all publisher from particular city or country

mysql> select * from publisher
where city = "Mumbai" OR country = "India";

publisher_id	name	city	country
1	CRC Press	Mumbai	India
2	Oxford	Publisherli	India

(*) Update contact number of author having author_id = 3

mysql> Update author
SET contact = "900000000"
where author_id = 3;
